EXPERIENCE

Sr. Nextjs Developer

📅 Jul 2021 - Present

Antier Solutions

- Antier Solutions - Punjab , India -----Roles and responsibilities:-
- Next.js Development: Lead and contribute to the development of complex web applications using Next.js, ensuring high performance, scalability, and reliability.
- Architecture Design : Design and implement scalable and maintainable architectures for Next.js applications, considering performance optimization, SEO, and security.
- Frontend Development : Proficient in React.js, CSS, and other related front-end technologies, capable of creating responsive and intuitive user interfaces.
- Server-Side Rendering (SSR): Implement SSR using Next.js to enhance performance and search engine optimization.
- API Integration : Integrate and work with various APIs, including RESTful APIs and GraphQL, and handle data management and state effectively.
- Performance Optimization : Identify and resolve performance bottlenecks, optimise code, and improve loading times through various techniques.
- Testing and Debugging : Develop and implement testing strategies, perform debugging, and ensure code quality through unit testing and end-to-end testing.
- Version Control and Collaboration : Proficient in using version control systems like Git and capable of collaborating with teams effectively using tools like GitHub or GitLab.
- Leadership and Team Collaboration:
- Technical Leadership : Provide technical guidance and mentorship to junior developers, assisting them in skill development and problem-solving.
- Collaboration : Work closely with cross-functional teams such as designers, product managers, and backend developers to ensure seamless integration and collaboration.
- Project Management : Lead or assist in project planning, scoping, and execution, ensuring timely delivery of high-quality products.
- Code Review : Conduct and participate in code reviews to maintain code quality, adherence to best practices, and standards.
- Problem Solving and Innovation:
- Innovative Solutions : Propose innovative ideas, solutions, and strategies to improve product quality, user experience, and development processes.
- Problem Solving : Troubleshoot complex issues, identify root causes, and implement solutions efficiently.
- Communication and Documentation:
- Clear Communication : Communicate effectively with team members, clients, and stakeholders, ensuring clarity in technical discussions and project updates.
- Documentation : Create and maintain technical documentation, including architecture designs, API specifications, and code documentation.
- Continuous Learning:
- Stay Updated : Keep up-to-date with the latest trends, tools, and technologies in the Next.js ecosystem and front-end development in general.
- Continuous Improvement : Actively seek opportunities for personal and team improvement, fostering a culture of continuous learning and growth.

Associate Reactjs Developer

 Aug 2020 - Jul 2021

Cybertron Technologies

- Roles and responsibilities:-
- Front-End Development: Assist in the development of user-facing features using React.js. Work closely with senior developers to translate designs and wireframes into high-quality code.
- Code Implementation: Write clean, maintainable, and efficient code. Collaborate with the development team to implement front-end solutions that align with project requirements.
- Component Development: Contribute to the creation and maintenance of reusable React components. Ensure these components are well-documented and easily integrated into various parts of the application.
- Bug Fixes and Troubleshooting: Support the identification and resolution of technical issues, bugs, and performance problems within the React codebase. Work alongside team members to debug and troubleshoot applications.
- Version Control: Utilise version control systems (e.g., Git) to manage and maintain code repositories. Follow best practices for branching, merging, and code reviews.
- Collaboration and Communication: Participate actively in team discussions, providing input and ideas for improving processes, code quality, and overall development. Communicate effectively with team members, reporting progress and challenges.
- Testing and Quality Assurance: Assist in writing and executing unit tests to ensure the reliability and robustness of code. Work with QA teams to identify and resolve issues before deployment.

EDUCATION

Bachelors, Computer Science

Veer Bahadur Singh Purvanchal University

- Technologies HTML5, XHTML, CSS2/3, JavaScript, Typescript, JSON, Bootstrap, DOM, Frameworks/Lib Next JS, React JS, Redux, Flux, Node JS. IDE's & Version NetBeans, Visual Studio Code, Control Notepad++, Sublime, Eclipse, GIT Methodologies Agile, Scrum, Waterfall. Tools Bachelors from Veer Bahadur Singh Purvanchal University
